Safety Bulletin

**CECCO**

## UPDATE

Please find below the **updated** health and safety guidance bulletins developed jointly by the Building Trades, CECCO and COCA. They have been updated to include recent changes to the Reopening Ontario Act that require the wearing of eye protection when a worker is working within 2 metres of another worker (both inside and outside). This is a requirement even when both workers are wearing masks.

It is also important to note that prescription eye glasses without side shields would not be considered adequate eye protection. Previously this was only required during the interaction with the public but it has since changed.

**Please distribute these health and safety guidance information as widely as possible.**
