EPSCA TRADES ACCREDITATION INSULATORS & PAINTERS
--

EPSCA is in the process of applying for Accreditation for a number of trades. EPSCA's intent is to have trades become accredited strictly for that portion of the power sector that is currently covered by EPSCA's agreements.

The next accreditation process will involve the painters and insulators. Thus contractors who have or are working in the power sector using these two trades are likely to receive correspondence from EPSCA and the OLRB in the near future. Once this campaign has been completed, EPSCA will continue the process over the next 2-3 years with the other unions. EPSCA will notify you as a courtesy once we begin the next round of accreditation.

I would ask for your assistance in communicating EPSCA's intentions to your membership so that we may alleviate any confusion and future concerns.

Thank you very much for your assistance with this matter.
